Title I School Improvement Funds for 2005-06

Kentucky must reserve 4% of its total Title I, Part A allocation for school improvement; 95% of the 4% must be allocated to districts that have Title I schools in need of improvement, corrective action, or restructuring. Tier 1 and Tier 2 schools are identified for improvement; Tier 3 schools are identified for corrective action, and Tier 4 and Tier 5 schools are identified for restructuring.

Use of Title I School Improvement Funds

1. Each district receiving Title I school improvement funds must ensure that each Title I school identified for improvement, corrective action, or restructuring is provided the resources necessary to meet its goals outlined in the comprehensive school improvement plan.
2. More specifically, the district may use the funding to meet school improvement requirements, including the student transfer option and supplemental educational services.
3. The district must use the funds for school improvement activities at the identified schools, including strategies to eliminate the achievement gap in subpopulations of economically disadvantaged students, students from major racial and ethnic groups, students with disabilities, and students with limited English proficiency.
4. The use of funds should be based on recommendations in the scholastic audit, review, or self-study for the identified schools. The district may require the identified school to undergo a self-study directed by the district.
5. The district may require that the identified school implement a comprehensive school reform model as a part of its school improvement plan. Adopting a comprehensive reform model can be an effective strategy, especially if the school in improvement is in search of an external structure and technical assistance that will help it identify and address organizational and instructional issues. However, a model alone cannot address all of the identified needs of a school and cannot substitute for a coherent plan for systemic change.
6. If there is more than one identified school in the district, the district may combine the funds to be used for the identified schools. The district should retain control of the funds to ensure that the most effective school improvement strategies are being implemented.
7. The district should collaborate with school councils and staffs to ensure buy-in and reform at the school level. Final decisions on expenditures are made at the district level.
8. Funds may **not** be used for administrative costs because the district administers school improvement as a part of Title I. Indirect costs may **not** be charged toward the grant. A district may **not** count administrative costs incurred in providing transportation for the option to transfer or supplemental educational services toward the 20 percent requirements.

Other Information about Title I School Improvement Funds

1. **Award Notification** – Each district with Title I schools identified for improvement, corrective action or restructuring receives an Award Notification with the allocation for the 2005-06 school year. The Title I school improvement funds are available from July 1, 2005 – September 30, 2007. However, funds should be expended during the 2005-06 school year, including summer activities. Costs for supplemental educational services and transportation for the option to transfer should be the priority for Title I school improvement funds.
2. **Method of Payment** – It is **not** necessary to submit a separate budget for the Title I school improvement funds, but the budget should be made available on the district website as a part of the comprehensive district improvement plan. MUNIS expenditure reports are submitted quarterly. Cash draw-downs are made on the federal cash request form. The MUNIS Project Number is 3206 for the Title I school improvement funds for 2005-06.
